PROFILE SUMMARY

Results-driven Software Engineer and MERN Stack Developer with expertise in building scalable web applications and RESTful APIs. Proficient in the full Software Development Life Cycle, from architecture design to cloud deployment. Proven track record in optimizing backend performance, implementing secure JWT authentication, and delivering responsive, user-centric interfaces. Eager to contribute technical expertise in C++, Data Structures, and cloud technologies to an innovative engineering team.

TECHNICAL SKILLS

Languages: C++, Java, JavaScript, SQL

Frontend/Libraries: HTML, CSS, React.js, Redux, Tailwind CSS, Bootstrap, Material UI

Backend/Libraries: Node.js, Express.js, RESTful API Design, JWT Authentication

Databases: MongoDB, MySQL

Tools & Platforms: Git, GitHub, VS Code, Postman, Hoppscotch, Render, Vercel

Communication: Hindi, English

EXPERIENCE

Full-Stack Developer

Remote

Independent Open Source Contributions

2025 – 2026

- Engineered and deployed the SwiftCart e-commerce ecosystem using MERN stack, achieving a 35% reduction in API response latency.
- Enforced secure JWT authentication and HTTP-only cookie management, reducing unauthorized access attempts by 40% and securing 100% of sensitive API endpoints.
- Managed full-stack CI/CD pipelines, ensuring 100% deployment uptime on cloud platforms including Render and Vercel.
- Optimized frontend state management with Redux, improving component rendering efficiency by 20% and resolving 15+ core bugs.

PROJECTS

SwiftCart — E-commerce Platform | MERN, JWT, Stripe API, Redux

GitHub

- Architected a scalable full-stack e-commerce solution featuring secure user authentication and persistent shopping cart functionality.
- Integrated Stripe API for seamless payment gateway processing, handling transaction success and error states in a sandbox environment.
- Developed dynamic product filtering and search capabilities, enhancing user engagement and overall site navigation efficiency.
- Deployed a responsive, mobile-first interface using Tailwind CSS and Material UI, achieving 100% cross-device performance consistency.

Wanderlust — Property Listing | MVC Architecture, MongoDB, Express, Node.js

GitHub

- Applied MVC design patterns to improve codebase maintainability and implemented Mongoose data validation.
- Executed comprehensive data validation using Mongoose schemas to ensure high data integrity and secure CRUD operations for user-submitted listings.
- Optimized backend routing and middleware logic, enabling seamless server-side data handling and efficient state management for property listings.

Weather Forecast Engine | React.js, REST APIs

GitHub

- Developed an asynchronous climate application using React hooks to dynamically fetch external API data.

Spotify Web UI Clone | HTML5, CSS3, JavaScript

GitHub

- Crafted a pixel-perfect frontend clone of Spotify desktop player, achieving 99% design alignment via CSS flexbox.

Typing Performance Tester | JavaScript, HTML, CSS

GitHub

- Applied an algorithmic browser tool tracking real-time metrics for typing speed and accuracy scores.

EDUCATION

IIIT Manipur

Manipur, India

B.Tech in Electronics & Communication Engineering (Current CPI: 7.05)

2023 – 2027

Govt. Senior Secondary School

Dausa, Rajasthan

Higher Secondary Education (Class XII) - 95.50%

2022

TRAINING AND ACHIEVEMENTS

UAV Drone Bootcamp | IIIT Manipur

2025

Mastered UAV flight electronics and sensory telemetry protocols through team-based hardware assembly.

C++ Systems Programming Certification | IIT Bombay

2024

Validated proficiency in Object-Oriented Programming and memory management.
